

Look to Toshiba for your cloud print and workflow solutions.

Today's new hybrid work environment demands that information be available and accessible from anywhere, at any time, for organizations to be efficient and productive. Cloud enablement is no longer an option, but a requirement for all solutions and services currently in use. Welcome Toshiba's Elevate Sky® cloud-based solutions for your print and document environment.

Elevate Sky® allows you to:

- Improve productivity
- Reduce costs
- Increase security and manageability

TOSHIBA

Reach for the cloud.

The solution for on-premises print complexities.

With the hybrid workforce growing every day, managing your print environment can become more of a challenge. The initial capital investment required for on-premises solutions is expensive, and deploying, managing and maintaining these requires additional IT support staff or you risk overextending your team. Fleet management and security can suffer too if limited visibility into your fleet and inefficiency deploying configurations and security measures create a management nightmare.

Moving to the cloud is the perfect way to alleviate these frustrations. As your organization makes the transition, it's never been more important to have a partner who can best prepare you for the journey.

Introducing Elevate Sky®.

With Elevate Sky®, Toshiba offers workplace solutions that seamlessly integrate print into your cloud strategy with cloud-enabled devices, software and services. Our cloud-enabled devices allow you to exchange data effortlessly and securely with leading cloud providers directly from the print device itself. Our software solutions further integrate that data from the device into cloud systems and workflows. All while our cloud-based management tools offer everything you need to increase serviceability, manageability, insights, and most importantly, security. Not sure how to make the switch? Toshiba has experience with cloud solutions since 2003, and our cloud services team has the knowledge and expertise you need to make the transition simple.

Improve your productivity.

A new workforce dynamic is at play; therefore, streamlining and automating your print management and document workflows has never been more important. Elevate Sky® has solutions that allow you to share documents seamlessly and securely from your devices directly to the cloud through leading cloud providers, including Google™, Microsoft®, Box™ and Dropbox™. Integrating with leading document management and workflow solutions, physical documents become digital, cloud-based workflows, making them simple and automatic, while allowing you to print to any location from any device. Leverage real-time development enhancements through app store tools, updates and patches as well, and gain fleet-wide visibility to make timely optimizations.

Reduce your costs.

We believe waste has no place in the future of business. That's why we've developed Elevate Sky® with cloud print management tools to eliminate on-site print servers and reduce the costs that come with them, as well as offer fleet-wide visibility to reduce print waste and optimize print service costs. It also allows you to shift the management burden of your existing fleet to our managed print experts to free up valuable IT resources and even reduce costly overhead.

Increase your security and manageability.

As productive and efficient as it is, the new work environment does come with its own set of risks. To ensure your business data is fully secure, Elevate Sky's fleet management tools allow you to centrally secure, service and manage your print and document environment – regardless of location. Using AI-based predictive analysis, we improve print fleet availability to provide enhanced remote services for faster problem resolution and limit onsite visits. To improve document security in the cloud, we offer encrypted data communication and automated software updates. And, our cloud infrastructure is also ISO 27001 certified for information security management and ISO 27017/27018 certified for cloud service security. Additionally, as our solutions are hosted either on Microsoft® Azure® or Amazon Web Services™ (AWS), they adhere to country-specific data security and protection guidelines such as HIPAA or GDPR.

Toshiba's Cloud-Based Services

Our cloud services experts are available to provide consulting, project management, implementation and technical support when and where you need it most.

Through Encompass Managed Print as a Service (MPaaS), we take care of your fleet management and optimization so you can concentrate on keeping work flowing in the reimagined workplace. Navigating the cloud can be tricky, so our consulting services are always available for cloud migration, leveraging our Cloud Print Optimization Study (CPOS), and change management. When it comes time to put everything into practice, our Toshiba experts will be by your side with implementation services, project management and technical support.

Connect with your Toshiba expert to see how the right cloud strategy can make all the difference in your organization.
