

Printing made simple for the anywhere workforce.

As modern work models continue to evolve, proven productivity tools like print can create unique challenges. When employees are traveling, working from home, or are simply on-the-go without easy access to network printers, keeping everyone productive becomes difficult. Fortunately, e-BRIDGE® Global Print simplifies printing from wherever you work, allowing you to send print jobs directly to cloud-connected Toshiba and Lexmark™ compatible MFPs, and then release when ready at the printer of your choice. And, thanks to industry-leading security, the entire experience is worry-free for you.

Worry-free printing from wherever you are.

While working from anywhere has its advantages, remote printing can be complicated. Many work from multiple locations with different printers at each one, making it difficult to know how to quickly print. Or they can't queue up print jobs from home and release them at work, which disrupts the natural workflow. Remote printing can be a struggle for IT as well. Setting up multiple drivers and print servers puts a strain on an already busy department. Fortunately, e-BRIDGE® Global Print takes the hassle out of printing for employees and IT alike, adding up to a more productive workforce.

e-BRIDGE® Global Print makes it easy to:

- Submit print jobs to the cloud from anywhere for location flexibility
- Print from Windows™ and macOS™ workstations, Chromebook™, iOS® and Android™ mobile devices
- Sign in from Google Workspace™ or Microsoft 365® accounts to quickly enable printing
- Release print jobs on demand conveniently and securely with access card or PIN
- Gain insights into your printing and devices with MFP usage logs
- Simplify deployment with Microsoft® Intune® for efficient configuration
- Eliminate IT overhead associated with managing print servers and more

Submit print jobs to the cloud

For your workplace to truly be flexible, employees need to be able to print from their home office, client's office, coffee shop, or from anywhere, really. e-BRIDGE® Global Print makes this easy. Once users simply install the Toshiba universal print driver onto their computer, they can send print jobs from virtually anywhere, and from any network. Mobile users can submit print jobs easily using the e-BRIDGE® Global Print app for iOS® or Android™ devices.

Authenticate with the latest security standards

With e-BRIDGE® Global Print, you can easily sign in from your Google Workspace™ or Microsoft 365® accounts to quickly enable printing. All documents are securely transmitted to and from the cloud hosted by Microsoft® Azure® and Amazon Web Services™ (AWS). And we've also simplified secure authentication by allowing users to log into the MFP using a dedicated PIN, or access card or badge. It's your choice and best of all, little to no training is required.

Release print jobs on demand

e-BRIDGE® Global Print ensures that the user has ultimate control over their print jobs. Since a job is submitted to the cloud, it can be printed on demand from any Toshiba or compatible Lexmark™ MFP, without worry that the printout will be left for others to see. With one simple sign-on from the MFP embedded application, a print job is released when the user is ready to receive it, keeping sensitive documents secure and reducing waste from forgotten printouts. Documents can be reprinted during the same session and are automatically deleted upon logout to ensure privacy.

Gain insights into print trends and devices

Tracking your MFP usage with e-BRIDGE® Global Print comes with distinct advantages. MFP usage logs provide insights into every single print job, regardless of where it originated. Our API access token further allows administrators to integrate this usage data with leading data visualization tools, such as Microsoft® Power BI®, Tableau®, and Microsoft® Excel® in real time, making it easier to gain insights on device usage and user productivity.

Simplify deployment for efficient configuration

Eliminate manual setups and say goodbye to user frustration! With simplified deployment tools like Microsoft® Intune®, e-BRIDGE® Global Print rolls out seamlessly across your organization. This streamlines configuration, saving IT resources and valuable time. Users get instant access to printing without any hassle, so they can focus on what matters most – their work.

Increase focus and collaboration

Digital media certainly has its advantages; however, employees often find it easier to stay focused and be more engaged with printed materials. Thanks to e-BRIDGE® Global Print, you can now print from virtually anywhere and pick up meeting materials with ease to allow for increased connection and collaboration, and, ultimately, a rise in productivity.

e-BRIDGE® Global Print from Toshiba

e-BRIDGE® Global Print from Toshiba provides a simple and secure way of printing for the anywhere workforce. It's easy to set up and start printing in no time, so you can focus on what's important and stay productive without dealing with unnecessary print frustrations – a win-win for everyone.
